edswimpolo@charter.net or 205-233-1826

Topic: The Transition Game

What does a successful counter attack look like?

How can an illegal action effect the outcome of a counter attack?

How does calling an offensive foul or exclusion foul during the transition effect outcome?

Initial Transition Stage

Who is the instigator? Be in position to see the whole action and not just the reaction otherwise the wrong player may be penalized

Maintain the level of physicality, keep it simple and safe

Transitions from the center forward area

Transitions from a shot attempt

Transitions from defensive steals or intercepted passes

The Middle Stage of Transitions

How players work to position for advantage. Duck-under versus slip-under

Targeting

Pull Backs

If you think you saw it, you probably didn't. Better to No Call than penalize the wrong player.

The Final Stage of transitions

Exclusion fouls, penalty fouls, shot attempts or goals.

Communication With Your Partner

Collaborate with your partner, be willing to trade-off areas when appropriate

Be in the best position to see the action and reaction of the player situation. Where are the "Hot Spots"?
